Paperboat Signal Hub

Product Specification

PSH-06

Fictional product diagram for template testing only.

Product Overview

Paperboat Signal Hub is a fictional training device for demonstrating signal recording, status review, and file export. The product, specifications, diagrams, and test conditions in this example are all fictional.

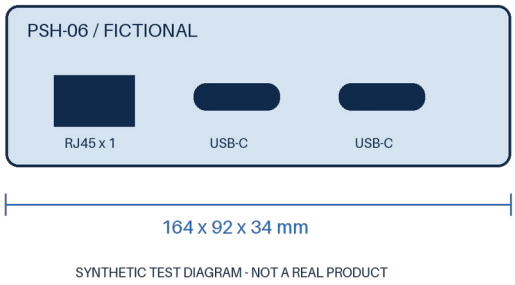

Example recording channels	Example internal storage	Example recording interval
6 channels	32 GB	30 s

Ordering Model

PSH-06: the example configuration has 6 recording channels and 32 GB storage; no options are specified.

Hardware and dimensions

PSH-06

Fictional product diagram for template testing only.

Technical specifications

Parameter	Specification
Recording channels	6 channels
Internal storage	32 GB; no options specified
Recording interval	Records every 30 s
Network interface	1 RJ45 port
USB interfaces	2 USB-C ports
Record capacity	At most 4096 example records
Power input	5 V DC / 2 A
Example consumption	7 W
Operating temperature	0 °C to 45 °C
Dimensions	164 mm × 92 mm × 34 mm
Weight	0.48 kg

Example validation metrics

This page demonstrates the metrics table layout. The values do not represent actual hardware test results.

Item	Example metric
Status display delay	⩽ 1.5 s
Recording interval	30 s

Fictional conditions: a training demonstration environment. All values on this page are template test data and make no product commitment.

Features and applications

Key Features

- Recording demo: Saves example signals at a fixed interval.
- Status review: Shows recent records and remaining capacity.
- File export: Exports the currently selected records.
- Local operation: Runs offline in a training environment.

Application scenarios

Area	Example applications
Classroom training	Demonstrates the basic recording workflow.
Device workshop	Explains interfaces and storage.
Product demonstration	Shows the fictional device workflow.
Layout testing	Checks bilingual document layouts.
